Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-3 and 5-8, laser device with particular liquid supply positioning.
- II. Claims 9-16, laser device with selective nozzle activation.
- III. Claims 17, 18, and 20, laser device with at least three nozzles.
- IV. Claims 21 and 23, laser device with selective supply means.
- V. Claims 24-26, laser methods comprising configuring a machine.
- VI. Claims 27-29, laser forming features to different depths.
- VII. Claims 30-32, laser methods comprising supplying liquids to regions.
- VIII. Claims 33-36, laser removal of substrate material.
- IX. Claims 37-39, laser methods comprising a first duration.

The inventions are distinct, each from the other because of the following reasons:

Inventions I-IV and Inventions V-IX are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another and materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus can be used for heating or illuminating without forming a feature in a workpiece.

Because these inventions are independent or distinct for the reasons given above and the inventions require a different field of search (see MPEP § 808.02), restriction for examination purposes as indicated is proper.

This application contains claims directed to the following patentably distinct species:

- I. Claims 1-3 and 5-8, laser device with particular liquid supply positioning.
- II. Claims 9-16, laser device with selective nozzle activation.
- III. Claims 17, 18, and 20, laser device with at least three nozzles.
- IV. Claims 21 and 23, laser device with selective supply means.
- V. Claims 24-26, laser methods comprising configuring a machine.
- VI. Claims 27-29, laser forming features to different depths.
- VII. Claims 30-32, laser methods comprising supplying liquids to regions.
- VIII. Claims 33-36, laser removal of substrate material.
- IX. Claims 37-39, laser methods comprising a first duration.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after

Art Unit: 1725

the election, applicant must indicate which are readable upon the elected species.

MPEP § 809.02(a).

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
